PROFESSIONAL SUMMARY

Tech Lead and Senior .NET Developer with 6+ years of experience architecting and delivering enterprise-grade web applications, REST APIs, and database-driven systems. Proven track record leading development teams to build 20+ enterprise modules across ERP, HRMS, and e-commerce platforms, and integrating 10+ third-party payment gateways for clients across 3+ countries. Skilled in C#, ASP.NET Core, ASP.NET MVC, Entity Framework, SQL Server, and Azure, with hands-on experience in microservices, API design, and database performance optimization. Strong background in code quality, mentoring, and cross-functional collaboration.

TECHNICAL SKILLS

Languages: C#, SQL, Python, JavaScript, Java, Swift, C++, HTML/CSS
Backend & APIs: .NET Framework, ASP.NET Core, ASP.NET MVC, Web API, Entity Framework, ADO.NET, RESTful APIs, Microservices Architecture
Database: Microsoft SQL Server, Stored Procedures, LINQ, Query Optimization, Redis
Frontend: Angular, JavaScript, jQuery, Bootstrap, HTML/CSS
Cloud & DevOps: Microsoft Azure, IIS, Git, GitLab
Payment Integrations: Stripe, Square, PayPal, Payment Sense, Hyper Pay
Tools & Practices: Visual Studio, Jira, Agile/Scrum, Unit & Integration Testing, Code Reviews, Technical Documentation

PROFESSIONAL EXPERIENCE

.NET Developer & Tech Lead <i>Smart Software Systems and Solutions Abu Dhabi, UAE</i>	2023 – Present
- Lead architecture and development of enterprise ERP, HRMS, and ordering platforms using ASP.NET Core, Web API, and SQL Server, serving clients across 3+ countries. - Designed and delivered 20+ enterprise modules - including payroll processing, attendance tracking, leave management, and employee self-service - using ASP.NET Core MVC and Entity Framework. - Optimized SQL Server schemas, indexing, and LINQ queries to improve application performance and data integrity. - Directed code reviews and mentored developers on .NET best practices, design patterns, and coding standards, raising overall code quality across the team. - Collaborated with UI/UX designers, product managers, and QA to translate requirements into production-ready features delivered on schedule.	
Full Stack Developer & Team Lead <i>Samar Sol Ltd Cambridge, UK</i>	2021 – 2023
- Designed and built scalable web applications using C#, ASP.NET MVC, and SQL Server, ensuring maintainability and security across client projects. - Led application architecture decisions for multiple projects, balancing scalability, performance, and long-term maintainability. - Deployed and maintained web applications on Microsoft Azure, streamlining release cycles and improving system reliability. - Managed Git-based source control workflows for a distributed development team, reducing merge conflicts and improving release consistency. - Integrated 10+ third-party payment gateways (Stripe, Square, PayPal, Payment Sense, Hyper Pay) into ordering and loyalty platforms, enabling secure, flexible transaction processing. - Developed and published iOS applications to the App Store, extending product reach to mobile platforms. - Delivered technical support and defect resolution for end-users, improving system usability and reducing recurring issues.	
Digital Marketing Manager <i>Dev Strings Faisalabad, Pakistan</i>	2020 – 2021
Increased digital advertising ROI by analyzing campaign performance and optimizing targeting across social media, PPC, and email channels, contributing to a 30% revenue increase.	

- Grew company social media following by 50% within six months through targeted content and engagement strategy.
- Conducted market research to identify target audiences and growth opportunities, informing cross-functional product launches.

Home Tutor (Self-Employed)

2014 – 2020

Faisalabad, Pakistan

- Delivered personalized academic instruction and progress tracking for students across multiple subjects, building strong communication and mentoring skills.

KEY PROJECTS

Smart ERP HR & Payroll Web Portal — ASP.NET Core MVC, SQL Server, Azure

Built an HR and employee management system covering payroll processing, attendance tracking, leave management, employee self-service, and performance evaluation.

Perkss Online & EPOS Ordering System — .NET, SQL Server, Stripe, Square, PayPal, Angular, Azure

Designed a multi-brand online and EPOS ordering system with secure transaction processing across multiple integrated payment gateways.

Endurance Race Timing System — .NET Core MVC, SQL Server

Built a real-time race timing platform with participant management, automated result processing, and performance analytics.

Member-to-Member Brand Listing Platform — C#, Stripe

Developed the backend for a subscription-based brand discovery platform with secure payment processing.

Pop Deal Loyalty System — C#, Hyper Pay

Developed the backend for a loyalty points and deals platform with integrated reward management and payments.

EDUCATION

BS Software Engineering, Riphah International University

2016 – 2020

Gold Medalist — Outstanding Academic Performance

Intermediate of Computer Science, The Superior College

2014 – 2016

Grade A — Computer Science
